THE STORY

Mikey and his friends call themselves the Goonies, and their whole neighborhood is about to be bulldozed unless someone finds a miracle. In the attic, Mikey discovers an old map leading to the treasure of the pirate One-Eyed Willy. With a family of crooks called the Fratellis hot on their trail, the Goonies brave booby-trapped tunnels to save their homes.

SPOT IT WHILE YOU WATCH

1. The map that starts everything. Mikey lines up the doubloon with the coastline to find the way in.

2. The underground river. Most of the caves were giant sets built inside a warehouse.

3. One-Eyed Willy's treasure. Watch what Mikey saves in his marble bag at the very end.

BY THE NUMBERS

7 GOONIES — Mikey, Brand, Chunk, Mouth, Data, Andy and Stef

2 1/2 MONTHS — to build One-Eyed Willy's pirate ship at full size

$19 MILLION — to make the whole movie in 1985

HEY YOU GUYS! DID YOU KNOW...

- ★ The pirate ship was built FULL SIZE and the kids were not allowed to see it before filming, so their amazed faces are their first real look.
- ★ After the movie, nobody would take the ship, so it was scrapped.
- ★ Data is played by Ke Huy Quan. In 2023 he won an Oscar, almost 40 years after this movie.
- ★ Mikey is Sean Astin. He grew up to play Samwise in The Lord of the Rings.
